

Community Relations

PARTICIPATION BY THE PUBLIC

Community residents shall be encouraged to take an active part in school affairs. They may be invited to provide advice individually and/or collectively in such areas as:

1. Clarifying the general ideas and attitudes held by our residents regarding schools.
2. Developing board policies under which the school system is to be managed.
3. Establishing administrative arrangements and regulations designed to implement the policies.
4. Determining educational goals, the purposes of courses of study and special instructional programs and services to be provided for students.
5. Evaluating the extent to which these purposes are being achieved by present practices.
6. Giving active assistance to the certificated staff in the actual operation of classes and services where the staff deems such aid valuable.
7. Solving a specific problem or set of closely related problems about which the governing Board must make a decision.

The governing Board and the staff shall give weight to the advice which they receive from individuals and community groups regarding selected problems, especially when the individuals or groups have been asked by the District to give advice in specific areas, but the governing Board and staff shall use their best judgment in arriving at decisions, and may not delegate their responsibility to make a final decision.
