REPORTS, SURVEYS, REQUESTS FOR INFORMATION

The Governing Board expects that all reports, surveys and studies mandated by legislative, judicial or administrative agencies which have authority over the schools will be honored fully, and that they will be completed properly and in good time.

Optional reports, surveys and requests for information from any individual or organization whatsoever will be completed only when the Superintendent or principal believes that the amount of time required by staff will be reasonable, that an appropriate educational purpose will be served, that the individual or organization making the request is reputable, that no invasion of privacy of staff or student records is possible, that improper use of the report, survey or information is highly unlikely, and that assurance is received that the district will receive a copy of any report, survey, or published use of the information provided, when requested.
